Subject: RE: EPA NPDES Permits for Preston & P4 Monsanto

Follow Up Flag: Follow up
Flag Status: Completed

Hi David, We would love to accompany you on your visits to Preston and perhaps Monsanto. I am not sure at this point who may be available that day so I have included our engineering staff in this e-mail so I can let them weigh in on their availability. I am sure you have already considered a compliance schedule for Preston because they will likely not be able to meet their phosphorus limits without considerable design and construction upgrades.

You must have drawn the short straw on getting tagged with writing Monsanto's permit because it will likely be a complicated permit and I am curious at this point in what all data you have available to you to start that process. We look forward to those conversations. Thanks for the heads up. LVE

Subject: EPA NPDES Permits for Preston & P4 Monsanto

Hi Lynn,

I'm a relatively new Permit Drafter with the NPDES Permits Unit here at EPA in Seattle. I have a draft version of the NPDES Permit for the City of Preston that is undergoing internal review before we send it to Idaho for 401 Certification. I will be visiting the City of Preston WWTP on Tuesday, May 24th. I wanted to get in touch with DEQ and offer if one of your staff would like to attend the visit with me, or if we know who would be reviewing the permit, get them in touch with me so we can discuss a timeline for the 401 Certification.

I'm also beginning to work on the NPDES Permit for the P4 Monsanto plant in Soda Springs, ID. I do not have a draft permit for this facility yet, but I am planning on visiting the facility while I am in the (relative) area on Tuesday, May 24th. I'd like to extend the same offer to visit with me at this facility as well.

Feel free to put me in touch with any IDEQ staff you believe I'd be working with on these permits as we move forward, and if you have any questions feel free to contact me at any time.

David Brick
